

Hose Barb Tank Mount Suction Strainers

Benefits

- One piece fitting
- Epoxy bonded stainless steel pleated screen
- Flow rates to 100 gpm
- Perforated steel support tube

Features

A Hose Barb tank-mounted strainer is used in hydraulic fluids, coolants, lubricants and many process fluids.

It is installed through a tank top and may be removed for servicing without draining the tank.

Options

- 3 or 5 psi bypass
- Custom sizes, screens and adapters
