

"Unparalleled Delivery Times on Custom and Standard Filtration Products"

Custom Made Filters

DO YOU HAVE A NEED FOR CUSTOM MADE FILTERS? This is Ohio Fabricators specialized area. Please realize that we have been making filters for over 78 years. Engineers, purchasing managers, designers, and business professionals have been coming to OFCO to solve their product issues because of our reputation of delivering quality products with industry-leading delivery times. That includes our custom designed filter products. There isn't much we cannot make. We would love to be your first contact for any filter you need. We will always be honest with you. If we can make it, we will tell you. If we can't make it, we will tell you that, too. No matter the quantity we will work with it as we can. After all, we are in business to help people solve problems.

To make life easier for all, click on the link below which will take you directly to our [Filter Element Identification Worksheet](#). This worksheet will give us the information we need in order to quote as accurately as possible. Just fill in the blanks, send the worksheet to us, and we'll do the rest.

Mesh & Micron Comparison – What's the Difference?

It has been a while since we covered this area and it is such an important one that it should be covered again for emphasis and clarification. Wire cloth manufacturers talk in terms of "mesh" and filter people talk in terms of "micron." It can be so confusing at times. These two terms mix like water and oil. You can always go to our website in our Learning Center and access a simple chart that will help. Download it and print it out and keep it handy at your desk. Click on this link and it will take you directly to the form.

[Mesh/Micron/Inch Comparison Chart and Flow Rate Comparisons.](#)

It can be confusing to determine the correct level of filtration if the customer and user aren't really sure if "they are speaking the same language." For example, you can see that 149 micron is really the same as 100 mesh. Applications need filters of a certain level of filtration to help perform efficiently and it could be disastrous if an improper filter was installed. System damage could occur. Education is learning what you didn't even know you didn't know.

Reservoir Accessories

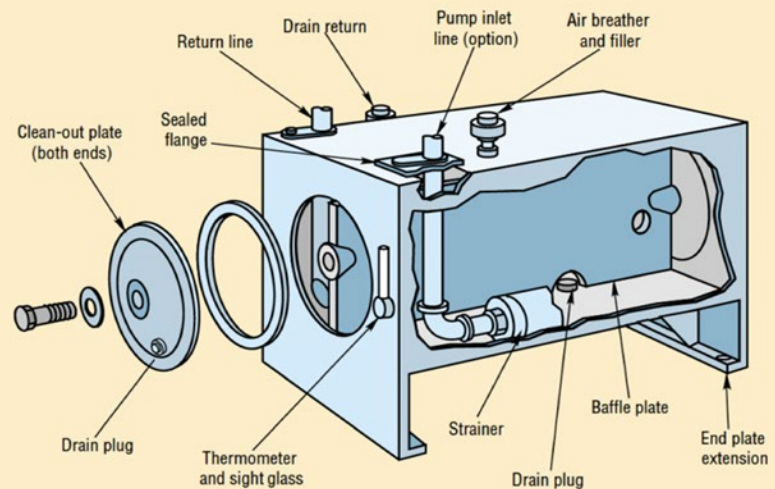

OFCO's Standard Product

The reservoir is a basic part of any hydraulic system and has a considerable daily effect on the operation. Filtration is a neglected science.

It seems only highly complex companies seem interested in monitoring their systems oil, too. Also, with smaller reservoirs trending, "accessories" become more important to ensure a long and dependable hydraulic system operation. OFCO has the standard products to help in the war against contamination.

Here is a basic, typical hydraulic reservoir. The fluid in the reservoir, before it leaves and after it returns from the operation, must be kept clean. That is why we manufacture the filters and strainers to do exactly that. From suction strainers and tank mounted strainers, to return line strainers and diffusers. OFCO can help keep your system running efficiently. Our air breathers protect the inside of the reservoir from environmental air contamination. We help protect the fluid in the reservoir, outgoing and incoming. Take a look at what we offer in different physical sizes, pipe sizes, and level of filtration. No matter what the operation is, we can help keep the fluid in the reservoir clean so it is reliable when it goes to work. Go to our website to see how we can help.

3 Words That Lead to a Better Business

Excellence

The quality of a person's life is in direct proportion to their commitment to excellence, regardless of their chosen field of endeavor.

Teamwork

The ability to work together toward a common vision. The ability to direct toward organizational objectives. It is the fuel that allows common people to achieve uncommon results. Simply stated, it is less me and more **WE**.

Quality

Quality is never an accident. It is always the result of high intention, sincere effort, intelligent direction, and skillful execution. It represents the wise choice of many alternatives.
